

WallMax® Group

WRF Series

WallMax® Rectangular Frame Openable

Wallmax Rectangular Frame Openable are metal structures with single wall opening.

A large variety of combinations is available in terms of sizes and materials, allowing to satisfy specific customer needs.

WRFO solutions are designed for installation where cables/ pipes are already in place and it is not feasible to cut them and re-installed them. They are supplied with a partially welded side. WRFO solutions are designed for installation through welding.

WRFO frames are used in combination with WMR series modules and accessories to achieve customised sealing solutions.

The numerous combinations of packing space allow for development of cable transit solutions specific to customer's needs.

Key benefits:

- » Single wall opening metal frame with partially welded side
- » Supports a variety of module and material combinations
- » Ideal for retrofits where cutting/re-installing cables and pipes is not feasible
- » Compatible with WMR modules and accessories
- » Designed for welded installation

Materials:

Primed Steel
SS AISI 316 L
Aluminium
