

WallMax® Group Accessories

WallMax® Expander (WE)

WallMax® Expanders are designed to compress the chosen module combination into each packing space within a frame, tightly sealing cable and pipe entries against passage of external elements.

Compression can be easily controlled through the frontal screw.

Key benefits:

- » Compresses module combinations within the frame packing space
- » Ensures tight sealing of cable and pipe entries against the passage of external elements
- » Controlled compression via frontal screw

Materials:

SS AISI 316 L
Galvanised Steel
