

WallMax® Group

WP & WMS Series

WallMax® Plug

WallMax® Plugs are useful complements to WallMax® Regular Modules Without Plugs.

The cylinders can be used as plugs to seal existing wall installations without the need to completely replace the old modules in case of cable or pipe removal.

Key benefits:

- » Complement to WallMax Regular Modules without Plugs
- » In the event of cable or pipe removal, plug cylinders can seal empty entries without replacing entire modules

Material: EPDM Rubber

To be used in combination with

Code	Article	External dimensions (mm)		Depth	Weight	
		ø mm	ø in		g	lb
